

ANTHROPOLOGY

(ANTHR)

What is Anthropology? It is the study of the biological basis of human evolution, genetic variation within the human species and patterns of global cultural change.

Studying Anthropology at College of Alameda exposes you to cutting edge coursework looking at the evolution of human biological structures, population genetics, and cultural selection factors, which contribute to human variation and change. We offer an Associate in Arts (AA) and an Associate in Science (AS) degree. Additionally, coursework from this department meets requirements for University of California (UC) and the California State University (CSU) systems' lower-division transfer credits, and also meets UC lower-division major and CSU general education requirements. We also give major consideration to contemporary bioscience trends and their consequent impact on health care and technological change.

Careers in anthropology include: anthropologist, archaeologist, artifacts conservator, curator, ethnologist, Foreign Service officer, immigration service official, international aid agencies official, international business employee, multicultural education instructor, museum curator, park ranger, park service official, professor/teacher, refugee worker, researcher, social science teacher, social worker, travel consultant, and urban planner.

Upon completion of Anthropology Program at College of Alameda, students will gain the following knowledge and skills that have been established under the **Program Learning Outcomes (PLOs)**:

1. Analyze specific bio-culture patterns, concepts and research strategies.
2. Comprehend and apply anthropological theories, terms, and concepts to written text.
3. Address, analyze and amplify an emerging Cultural and Physical Anthropological perspectives that the past, present and future are inextricably linked. These emerging academic, career and environmental perspectives must be better understood by current and future generations.
