

COMPUTER INFORMATION SYSTEMS (CIS)

Computer Information Systems discipline is the integration of three dimensions: Technology, Organization, People (“TOP”). Technology (IT) dimension involves hardware, software, network, and database management. Organization dimension involves politics (power distribution), policies (codes of conduct), and procedures (process methods). People dimension involves skills, training, ergonomics (man-machine synergy), and personalities (“STEP”).

CIS discipline is dedicated to students seeking to develop their technology skills.

Bureau of Labor Statistics (BLS) in 2018 reports jobs for computer and information technology will grow 13 percent from 2016 to 2026, faster than the average for all occupations. CIS jobs are projected to add about 557,100 new openings. This growth in CIS industry stems from demands for cloud computing, information security, online storage and analysis of big data.

The median annual wage for CIS occupations, which include managers, was 84.5K in May 2017, higher than the median annual wage for all occupations of 37.7K. According to Payscale.com, the average annual pay for IT Specialists, which exclude managers, is 55K within 36K to 96K range.

Students should consider what we offer – CIS degree, CIS certificate of achievement, Desktop Help Technician certificate or Web Publishing certificate of proficiency.

ASSOCIATE OF ARTS *or* CERTIFICATE OF ACHIEVEMENT

Students satisfactorily completing the following required courses will be eligible for the **AA degree** and the **Certificate of Achievement in Computer Information Systems**. Confer with a counselor or the dean concerning the specific pattern of requirements for this program and refer to the Degrees and Programs section of the Catalog for information on the Associate in Arts degree.

Computers are everywhere and impact many of our daily activities. Our lives are dependent on information from a computer. Computer skills are a necessity in today's technological world.

The **CIS program at College of Alameda** prepares you for entry-level business opportunities requiring the use of computer applications, such as word processing, spreadsheet, database management, and geographical information systems (GIS) programs. Our CIS program prepares you for transfer to a university. Advanced students take programming courses, help desk and networking courses, and web publishing courses.

We offer beginning and advanced office application courses. We are the only Peralta college to offer help desk (desktop support technician) courses and networking courses. Our web publishing courses, offered as hybrid (with some face to face meetings) as well as online, lead to a certificate of proficiency upon successful completion of the courses. We also offer other online CIS courses which can fit your busy schedule.

Career Opportunities

The Computer Information Systems (CIS) program prepares students for entry level business positions requiring the use of computer applications, and will qualify students in the use of word processing, spreadsheet and database management applications. More advanced students may enroll in telecommunications and computer networking courses. In some instances, students with work experience in the above mentioned areas may challenge courses based on that experience. Students seeking advanced placement must meet with an instructor to verify knowledge and skills.

Program Learning Outcomes

Upon completion of this program a student will be able to:

- Develop an understanding of the problems and issues confronting individuals and society in general in the use of computers
- Analyze problems and design solutions using the program life cycle concept, HIPO charts, and program logic flowcharts
- Use and write simple Visual Basic code
- Create presentation-quality charts of several types
