Data Sharing

The Student Success Metrics (SSM) will be shared with the campus stakeholders as part of the Guided Pathways process.

SSM Data Sharing

I agree with the SSM data sharing.
Yes

Pillar 1. Clarify the Path

Practice A

Programs are organized and marketed in broad career-focused academic and communities or "meta-majors". (Note: This practice was added to the SOAA in February 2019).

Scale of Adoption at Our College

Scaling in progress

Progress to Date

Progress to Date Implementing Practice

The college began to create prototype ADT program maps in Spring 2019 with the participation of faculty, staff, and students (in focus groups). In Fall 2019 the college completed the development of two-year program maps of all degrees and certificates with all campus constituencies involved at multiple points in the process. We have inventoried the course offerings as suggested by the program maps, and have cross-referenced them in preparation for the creation of "meta-majors" during the Spring 2020 semester.

Timeline for Progress to Date

Term and Year

Fall - 2019

Next Steps

Timeline for Next Steps

Next Steps Toward Implementing Practice at Scale

2020 - Publish maps on each of the degree webpages and determine institutional process for the upkeep of each degree map.

During the Spring 2020 semester we will analyze the program map data for "meta-major" grouping.

Develop the "meta-majors," and develop campus vocabulary around them.

Practice B

Every program is well designed to guide and prepare students to enter employment and further education in fields of importance to the college's service area.

Scale of Adoption at Our College

At scale

Progress to Date

Progress to Date Implementing Practice

Associate Degree programs and certificates were designed with workplace skills in mind when selecting GE offerings. ADT program major sequences and General Education courses were designed with an eye to the question "what do students need to learn here that they'll use when they transfer there." Career Education sequences were designed in consultation with advisory committees whenever possible.

Student Engagement & Support

Student Engagement: Implementation

In what ways are you continually engaging students in the planning and implementation of Guided Pathways on your campus? (Minimum of one required)

- Student survey(s)
- Students serve on campus GP advisory committee(s)
- Student focus groups

Engagement Efforts - Details

Student Survey(s) - We gathered student surveys in a several of our English 1AS classes last semester to help us select our GP mapping template and we hope to continue gathering student surveys when we move into our next phase of designing our meta majors.

GP advisory committees – students have served on design team (to help with planning) and on the ADT and AA/AS teams (to help faculty and staff build program maps for each discipline). In collaboration with faculty and staff, the design team reached out to students on campus to help us build program maps for each ADT/AA/AS and certificate program. Students presented during flex day with their ADT/AA/AS team members to inform the college of the proposed program maps and their thought-sharing process.

Students from ASCOA and selected English and Math courses, as well as the student body at large, will be integral as we develop our campus vocabulary around Meta Majors both naming individual groupings and the term we use for the concept.

Course Alignment

We hope to schedule our future course offerings in alignment with the planned courses in our program maps which will help inform when courses will be planned into our student education plans.

After completing AD-T, Associates' and Certificate mapping which are intended to guide the development of students' SEPs, we have compiled an inventory of which courses the disciplines have placed in specific terms, and will use that information for cross-discipline scheduling conversations, as well as ensuring the right number of sections of each course in each academic term.

Challenge

How to map all certificates and degrees at the college into two-year patterns while simultaneously receiving feedback/support from all campus constituencies.

Success Story

We began discussions of program mapping in Spring 2019 with several faculty cohorts working on mapping our 11 ADTs. These initial groups also included student focus groups to understand the difficulties with current program pattern practices and look to the future for better results.

Large (for our campus) teams of faculty, staff, and students came together in Fall 2019 to complete program mapping for all degrees and certificates, and to outline and discuss the formatting of future maps that benefit the students and take into account their feedback even down to the design level. Student served on the mapping and meta-majors design team (to help with planning) and on the ADT and AA/AS teams (to help faculty and staff build program maps for each discipline). In collaboration with faculty and staff, the design team reached out to students on campus to help us build program maps for each ADT/AA/AS and certificate program. Students presented during flex day with their ADT/AA/AS team members to inform the college of the proposed program maps and their thought-sharing process. After completing AD-T, Associates' and Certificate mapping which are intended to guide the development of students' SEPs, we have compiled an inventory of which courses the disciplines have placed in specific terms, and will use that information for cross-discipline scheduling conversations, as well as ensuring the right number of sections of each course in each academic term.

Students from ASCOA and selected English and Math courses, as well as the student body at large, will be integral as we develop our campus vocabulary around Meta Majors - both what individual major groupings are called, and the term we use to describe the concept.

Outcomes

A complete set of program maps that will be included in the college catalog and that are being developed into one-page brochures and webpages for our students/faculty/staff to assist in counseling, program guidance, etc.

Vision for Success Goals

- Increase by at least 20 percent the number of California Community College students annually who acquire associate degrees, credentials, certificates, or specific skill sets that prepare them for an in-demand job.
- Increase by 35 percent the number of California Community College students transferring annually to a UC or CSU

- Decrease the average number of units accumulated by California Community College students earning associate degrees

Success Story

Title

Creating a bridge to credit pathway

Follow-up Contact Persons(s)

Name	Title	Email	Phone
Nicole Kelly		nkelly@peralta.edu	

Challenge

How to assist noncredit ESOL student to bridge into English-language programs at the college, either for career development or transfer.

Success Story

College of Alameda, Adult Education Office – member of the Northern Alameda Adult Education Collective – developed relationships with Las Casas and Spanish Speaking Citizens’ Foundation (SSCF) in 2017 and has been providing transitions services ever since. Through these strategic partnerships and internal collaboration, the ESOL department is now offering Bridge-to-Credit classes at each site. Starting in fall of 2018, we have served over 381 new students (not including spring 2020) who did not previously have access to College of Alameda. Each semester, Las Casas host one section of the noncredit ESOL 541 series, and SSCF host four sections.

Outcomes

Increased participation of ESOL students in for-credit ESOL programs at the college which then bridge to career education or transfer programs.

Vision for Success Goals

- Reduce equity gaps across all of the above measures through faster improvements among traditionally underrepresented student groups
- Reduce regional achievement gaps across all of the above measures through faster improvements among colleges located in regions with the lowest educational attainment of adults
